

Quad Cities Community Television Channels 15 & 16

Quad Cities Community Television is a non-profit organization that provides information on government and community issues and activities for the cities of Andover, Anoka, Champlin and Ramsey. This information is presented via local cable channels and on our website: <http://www.QCTV.org>.

Each city has a government channel 16 that provides cablecasts of local meetings, council updates and city sponsored events. Between programs the channels display an electronic bulletin board containing information regarding ordinances, meeting times, council agendas, and the weekly playback schedule. All four cities receive the same community channel 15. This cable signal reaches more than 17,000 households and includes programming schedules, local news, community talk shows, high school sports, special community events, school board meetings, municipal reports, and Access programs. In addition, channel 19 is a community electronic bulletin board that currently displays upcoming community events and sponsor information.
